DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 192-197 and 209-224 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-38 of U.S. Patent No. 6,595,998; furthermore, claims 192-197 and 209-224 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 202-208 and 231-234 of copending Application No. 10/458,174 and over claims 98-118 of copending application No. 11/084,288. The latter rejections over copending applications are provisional obviousness-type double patenting rejections because the conflicting claims have not in fact been patented.

Art Unit: 3733

Although the above conflicting claims are not identical, they are not patentably distinct from each other because, in the cases of both the non-provisional and the provisional rejections, the corresponding art sets forth substantially the same invention using only different phraseology. Where actual differences exist, the differences amount only to obvious modifications with respect to the other claimed inventions. For example, interchanging the terminology "wafer", "element" and "plate" does not significantly change the scope of the claim in terms of patentability, especially in light of the other requirements pertaining to how the elements are stacked. Likewise, merely increasing the size or area of the wafers would be an obvious matter to a person of ordinary skill in the art, in order to decrease pressure on the affected portions of the vertebra. In addition, it is noted that the "limitations" set forth in claims 194-197, 209 and 210 have not been given patentable weight since they do not set forth any active steps and do not affect the claimed method in a manipulative sense.

Response to Arguments

Applicant's arguments, see pages 6-9 of the response filed 20 December 2006, with respect to the rejection over Brantigan have been fully considered and are persuasive. Accordingly, this rejection has been withdrawn. However, Applicant did not overcome the double patenting rejections by the filing of a terminal disclaimer in compliance with 37 CFR 1.321(c) or (d), or by argument or amendment.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
